

IBExpert OEM Distribution Edition

The IBExpert Distribution OEM Edition allows you to distribute IBExpert with your own software for a period of 5 years.

Using your own program, the IBExpert OEM version is activated daily. The code generation is incorporated in your standard software. The IBExpert OEM can therefore run on all computers where your software is also running.

The IDE runs on all physical and virtual computers.

The IBEScript script engine runs on all physical and virtual computers.

OEM Versions

IBExpert.exe IDE full version with all functionalities

IBEScript.exe Script engine for batch files

IBEScript.dll Script engine for integration into your own 32-bit applications

Advantages

- ◆ New customers can be served immediately.
- ◆ New employees can be integrated immediately.
- ◆ Prompt transfer to other computers possible.
- ◆ The programme can be stopped immediately on your clients' computers.
- ◆ The use of the software is also permitted for your employees.
- ◆ Grows with your business, and is not dependent on the size of your business.
- ◆ Not limited to a certain number of computers

Costs

The OEM can be purchased with a one-time payment without updates for 5 years.

The OEM can be purchased with a one-time payment plus 25% per year including all updates for 5 years.

The OEM Edition may continue to be used on computers where it is already installed for an unlimited period of time even after the end of the 5 year period. However, no new installations are possible after the 5 year period ends.

Access to regular IBExpert updates, which are constantly enhanced to keep pace with Firebird database development.
